SUBJECT INDEX

Alloys *("Various" i.e. not listed elsewhere by name)*
Analyses of primary side oxide layers on steam generator tubes from PWRs and radiochemical issues on the contamination of primary circuits, E. Schuster, K.H. Neeb, W. Ahlfänger, R. Henkelmann and R.T. Järnström 152 (1988) 1
Kinetics of radiation-induced segregation in electron-irradiated dilute NiSi and NiGe alloys, A. Bartels, F. Dworschak and M. Weigert 152 (1988) 82
Flow-assisted corrosion of steel and the influence of Cr and Cu additions, D. Cubicciotti 152 (1988) 259
Radiation blistering in Inconel-625 due to 100 keV helium ion iradiation, J.L. Whitton, A.S. Rao and M. Kaminsky 152 (1988) 278
On the shift of a phase equilibrium curve in binary alloys under irradiation (Letter to the Editors), A.S. Bakaj and A.A. Turkin 152 (1988) 331

Aluminium, Aluminium Alloys and Compounds
The critical point data of refractory metals, aluminum oxide and uranium dioxide using the Hoch–Arpshofen method, M. Hoch 152 (1988) 289

Analytical Techniques
Analyses of primary side oxide layers on steam generator tubes from PWRs and radiochemical issues on the contamination of primary circuits, E. Schuster, K.H. Neeb, W. Ahlfänger, R. Henkelmann and R.T. Järnström 152 (1988) 1
X-ray spectroscopic investigation of Pu-substituted zirconolite, R.B. Greegor, F.W. Lytle, R.J. Livak and F.W. Clinard, Jr. 152 (1988) 270

Ceramics *("Various" i.e. not listed elsewhere by name)*
Conductivity measurement and effect of impurity ions dissolved in Li_2O, S. Konishi and H. Ohno 152 (1988) 9
Fast neutron damage in TiC_{1-x}, H. Matsui and M. Iseki 152 (1988) 14
Sintering of boron carbide and boron carbide–silicon carbide two-phase materials and their properties, F. Thévenot 152 (1988) 154
XPS and TDS studies of trapping states of helium implanted in TiO_2, Y. Baba and T.A. Sasaki 152 (1988) 295
Sputtering yield of vapor-deposited TiC films by low energy deuterium ions (Letter to the Editors), T. Shikama and J. Bohdansky 152 (1988) 328

Cladding Materials
Anomalously high rate of oxidation of Zircaloy particles in air at the $\alpha/\alpha+\beta$ phase transformation (Letter to the Editors), T. Bereznai and R. Würtz 152 (1988) 323

Coatings *(incl. Coated Particles)*
Sputtering yield of vapor-deposited TiC films by low energy deuterium ions (Letter to the Editors), T. Shikama and J. Bohdansky 152 (1988) 328

Compatibility and Corrosion
Analyses of primary side oxide layers on steam generator tubes from PWRs and radiochemical issues on the contamination of primary circuits, E. Schuster, K.H. Neeb, W. Ahlfänger, R. Henkelmann and R.T. Järnström 152 (1988) 1
Effects of iodine concentration on iodine-induced stress corrosion cracking of Zircaloy-4 tube, W.S. Ryu, Y.H. Kang and J.-Y. Lee 152 (1988) 194
Flow-assisted corrosion of steel and the influence of Cr and Cu additions, D. Cubicciotti 152 (1988) 259
Steady-state corrosion rate of Type 316 stainless steel in sodium in a non-isothermal loop system (Letter to the Editors), T. Suzuki and I. Mutoh 152 (1988) 343

Computer Calculations, including Modelling
Theoretical study of the effect of point defects on the elastic constants of copper, G.J. Ackland 152 (1988) 53
Defect production rates in metals by reactor neutron irradiation at 4.6 K, G. Wallner, M.S. Anand, L.R. Greenwood, M.A. Kirk, W. Mansel and W. Waschkowski 152 (1988) 146

Creep and Relaxation
Irradiation creep properties of a near-isotropic graphite, T. Oku, K. Fujisaki and M. Eto 152 (1988) 225

Defects and Defect Structures
Theoretical study of the effect of point defects on the elastic constants of copper, G.J. Ackland 152 (1988) 53
Defect production rates in metals by reactor neutron irradiation at 4.6 K, G. Wallner, M.S. Anand, L.R. Greenwood, M.A. Kirk, W. Mansel and W. Waschkowski 152 (1988) 146

Diffusion *(incl. Thermodiffusion)*
Influence of nickel concentration on point defect migration in high-nickel Fe–Cr–Ni alloys, C. Dimitrov and O. Dimitrov 152 (1988) 21
Deuterium permeability of the austenitic stainless steel AISI 316, O. Gautsch and G. Hoddap 152 (1988) 35
The transport of short-lived fission products close to the fuel surface, C. Wise 152 (1988) 102
Diffusion of ion implanted helium in vanadium and niobium, M.B. Lewis 152 (1988) 114
Hydrogen in 316 steel – Diffusion, permeation and surface reaction, D.M. Grant, D.L. Cummings and D.A. Blackburn 152 (1988) 139
Diffusion of liquid uranium into foils of tantalum metal and tantalum–10 wt% tungsten alloy up to 1350 °C, M. Kuznietz, Z. Livne, C. Cotler and G. Erez 152 (1988) 235
On the shift of a phase equilibrium curve in binary alloys under irradiation (Letter to the Editors), A.S. Bakaj and A.A. Turkin 152 (1988) 331

Fatigue and Fracture
High-heat-flux test of commercial graphite tiles by high current and low energy electron beam, M. Fujitsuka, T. Shikama, Y. Yamauchi, H. Shinno and M. Okada 152 (1988) 163
Effects of iodine concentration on iodine-induced stress corrosion cracking of Zircaloy-4 tube, W.S. Ryu, Y.H. Kang and J.-Y. Lee 152 (1988) 194

Fission Products
The transport of short-lived fission products close to the fuel surface, C. Wise 152 (1988) 102

Fuels and Fuel Elements: Fast Reactors
SGMP – An advanced method for fabrication of UO_2 and MOX fuel pellets, E. Zimmer, C. Ganguly, J. Borchardt and H. Langen 152 (1988) 169

Fuel and Fuel Elements: Thermal Reactors
A simulation of the swelling of intermetallic reactor fuels (Letter to the Editors), R.C. Birtcher, C.W. Allen, L.E. Rehn and G.L. Hofman 152 (1988) 73
SGMP – An advanced method for fabrication of UO_2 and MOX fuel pellets, E. Zimmer, C. Ganguly, J. Borchardt and H. Langen 152 (1988) 169
Chemical interactions in water-cooled nuclear fuel: A thermochemical approach, E.H.P. Cordfunke and R.J.M. Konings 152 (1988) 301

Fusion Reactors: Blanket Materials *(incl. Lithium)*
Conductivity measurement and effect of impurity ions dissolved in Li_2O, S. Konishi and H. Ohno 152 (1988) 9
Specific heat of some Li-compounds, R. Brandt and B. Schulz 152 (1988) 178

Fusion Reactors: Surface Effects
Surface-limited hydrogen release and uptake in metals, P.M. Richards 152 (1988) 246
Radiation blistering in Inconel-625 due to 100 keV helium ion iradiation, J.L. Whitton, A.S. Rao and M. Kaminsky 152 (1988) 278
Sputtering yield of vapor-deposited TiC films by low energy deuterium ions (Letter to the Editors), T. Shikama and J. Bohdansky 152 (1988) 328

Gases *(excl. Tritium)* in Metals, Alloys and Ceramics
Evidence for the movement of bubbles at low temperature in helium-irradiated Cu (Letter to the Editors), P.B. Johnson, A.L. Malcolm and D.J. Mazey 152 (1988) 69
Diffusion of ion implanted helium in vanadium and niobium, M.B. Lewis 152 (1988) 114
Tensile properties of welded helium charged 304L stainless steel, S.L. Robinson 152 (1988) 212
Surface-limited hydrogen release and uptake in metals, P.M. Richards 152 (1988) 246

Glasses and Amorphous Materials
Volumetric change of simulated radioactive waste glasses irradiated by the $^{10}B(n, \alpha)^7Li$ reaction as simulation of actinide irradiation, S. Sato, H. Furuya, T. Kozaka, Y. Inagaki and T. Tamai 152 (1988) 265
Methods for physical vapor deposition of the amorphous uranium–16.4 at% chromium alloy (Letter to the Editors), T.G. Kollie, J.G. Gooch, C.M. Egert, R.L. Bridges and D.A. Carpenter 152 (1988) 334

Simulated high-level nuclear waste glass leached in one type of Japanese groundwater (Letter to the Editors), H. Kamizono and H. Nakamura 152 (1988) 339

Grain Boundary
Grain growth with boundary pores, P. Hartland, A.G. Crocker and M.O. Tucker 152 (1988) 310

Graphite and Carbon
High-heat-flux test of commercial graphite tiles by high current and low energy electron beam, M. Fujitsuka, T. Shikama, Y. Yamauchi, H. Shinno and M. Okada 152 (1988) 163
Irradiation creep properties of a near-isotropic graphite, T. Oku, K. Fujisaki and M. Eto 152 (1988) 225
Iradiation-induced property changes of thermally oxidized nuclear graphites, H. Matsuo, K. Fujii and H. Imai 152 (1988) 283

Hydrogen and Hydrides
Deuterium permeability of the austenitic stainless steel AISI 316, O. Gautsch and G. Hoddap 152 (1988) 35
Plutonium aerosol generation in reducing and oxidizing atmospheres at high temperatures, A.F. Eidson, H.C. Yeh and G.M. Kanapilly 152 (1988) 41
Hydrogen in 316 steel – Diffusion, permeation and surface reaction, D.M. Grant, D.L. Cummings and D.A. Blackburn 152 (1988) 139

Iron and Iron Alloys *(see Steels)*
Influence of nickel concentration on point defect migration in high-nickel Fe–Cr–Ni alloys, C. Dimitrov and O. Dimitrov 152 (1988) 21

Irradiation Effects *(excl. Swelling and Voids)*
Fast neutron damage in TiC_{1-x}, H. Matsui and M. Iseki 152 (1988) 14
Kinetics of radiation-induced segregation in electron-irradiated dilute NiSi and NiGe alloys, A. Bartels, F. Dworschak and M. Weigert 152 (1988) 82
Cascade damage in nickel: Production, saturation and recovery, R.C. Birtcher and T.H. Blewitt 152 (1988) 204
Irradiation growth in zirconium–tin alloys at 353 and 553 K, A. Rogerson and R.H. Zee 152 (1988) 220
Irradiation creep properties of a near-isotropic graphite, T. Oku, K. Fujisaki and M. Eto 152 (1988) 225
Volumetric change of simulated radioactive waste glasses irradiated by the $^{10}B(n, \alpha)^{7}Li$ reaction as simulation of actinide irradiation, S. Sato, H. Furuya, T. Kozaka, Y. Inagaki and T. Tamai 152 (1988) 265
Radiation blistering in Inconel-625 due to 100 keV helium ion iradiation, J.L. Whitton, A.S. Rao and M. Kaminsky 152 (1988) 278
Iradiation-induced property changes of thermally oxidized nuclear graphites, H. Matsuo, K. Fujii and H. Imai 152 (1988) 283
XPS and TDS studies of trapping states of helium implanted in TiO_2, Y. Baba and T.A. Sasaki 152 (1988) 295
Sputtering yield of vapor-deposited TiC films by low energy deuterium ions (Letter to the Editors), T. Shikama and J. Bohdansky 152 (1988) 328
On the shift of a phase equilibrium curve in binary alloys under irradiation (Letter to the Editors), A.S. Bakaj and A.A. Turkin 152 (1988) 331
Effect of proton irradiation on tensile properties of Cu and a Cu–Cr–Zr alloy (Letter to the Editors), M. Appello and P. Fenici 152 (1988) 348

Kinetics
Kinetics of radiation-induced segregation in electron-irradiated dilute NiSi and NiGe alloys, A. Bartels, F. Dworschak and M. Weigert 152 (1988) 82
Surface-limited hydrogen release and uptake in metals, P.M. Richards 152 (1988) 246

Liquid Metals
Diffusion of liquid uranium into foils of tantalum metal and tantalum–10 wt% tungsten alloy up to 1350 °C, M. Kuznietz, Z. Livne, C. Cotler and G. Erez 152 (1988) 235

Mechanical Properties
High-heat-flux test of commercial graphite tiles by high current and low energy electron beam, M. Fujitsuka, T. Shikama, Y. Yamauchi, H. Shinno and M. Okada 152 (1988) 163
Tensile properties of welded helium charged 304L stainless steel, S.L. Robinson 152 (1988) 212
Effect of proton irradiation on tensile properties of Cu and a Cu–Cr–Zr alloy (Letter to the Editors), M. Appello and P. Fenici 152 (1988) 348

Microstructure *(incl. Textures)*
Methods for physical vapor deposition of the amorphous uranium–16.4 at% chromium alloy (Letter to the Editors), T.G. Kollie, J.G. Gooch, C.M. Egert, R.L. Bridges and D.A. Carpenter 152 (1988) 334

Phase Transformations
Chemical interactions in water-cooled nuclear fuel: A thermochemical approach, E.H.P. Cordfunke and R.J.M. Konings 152 (1988) 301

Physical Properties
Conductivity measurement and effect of impurity ions dissolved in Li_2O, S. Konishi and H. Ohno 152 (1988) 9
Fast neutron damage in TiC_{1-x}, H. Matsui and M. Iseki 152 (1988) 14
Oxidation state of uranium in $Y_xU_{1-x}O_{2\pm y}$ solid solution by magnetic susceptibility, C. Miyake, T. Isobe and S. Imoto 152 (1988) 64
Defect production rates in metals by reactor neutron irradiation at 4.6 K, G. Wallner, M.S. Anand, L.R. Greenwood, M.A. Kirk, W. Mansel and W. Waschkowski 152 (1988) 146
Specific heat of some Li-compounds, R. Brandt and B. Schulz 152 (1988) 178
Cascade damage in nickel: Production, saturation and recovery, R.C. Birtcher and T.H. Blewitt 152 (1988) 204
XPS and TDS studies of trapping states of helium implanted in TiO_2, Y. Baba and T.A. Sasaki 152 (1988) 295

Plutonium, Plutonium Alloys and Compounds
Plutonium aerosol generation in reducing and oxidizing atmospheres at high temperatures, A.F. Eidson, H.C. Yeh and G.M. Kanapilly 152 (1988) 41
X-ray spectroscopic investigation of Pu-substituted zirconolite, R.B. Greegor, F.W. Lytle, R.J. Livak and F.W. Clinard, Jr. 152 (1988) 270

Pore Behaviour
SGMP – An advanced method for fabrication of UO_2 and MOX fuel pellets, E. Zimmer, C. Ganguly, J. Borchardt and H. Langen 152 (1988) 169
Grain growth with boundary pores, P. Hartland, A.G. Crocker and M.O. Tucker 152 (1988) 310

Powder Processes and Products
Plutonium aerosol generation in reducing and oxidizing atmospheres at high temperatures, A.F. Eidson, H.C. Yeh and G.M. Kanapilly 152 (1988) 41
Sintering of boron carbide and boron carbide–silicon carbide two-phase materials and their properties, F. Thévenot 152 (1988) 154
Anomalously high rate of oxidation of Zircaloy particles in air at the $\alpha/\alpha+\beta$ phase transformation (Letter to the Editors), T. Bereznai and R. Würtz 152 (1988) 323

Refractory Metals and Alloys *(excl. Zr)*
Diffusion of ion implanted helium in vanadium and niobium, M.B. Lewis 152 (1988) 114
Cascade damage in nickel: Production, saturation and recovery, R.C. Birtcher and T.H. Blewitt 152 (1988) 204
Diffusion of liquid uranium into foils of tantalum metal and tantalum–10 wt% tungsten alloy up to 1350 °C, M. Kuznietz, Z. Livne, C. Cotler and G. Erez 152 (1988) 235
The critical point data of refractory metals, aluminum oxide and uranium dioxide using the Hoch–Arpshofen method, M. Hoch 152 (1988) 289

Safety – Nuclear Reactors
Sintering of boron carbide and boron carbide–silicon carbide two-phase materials and their properties, F. Thévenot 152 (1988) 154

Sodium
Steady-state corrosion rate of Type 316 stainless steel in sodium in a non-isothermal loop system (Letter to the Editors), T. Suzuki and I. Mutoh 152 (1988) 343

Steels
Analyses of primary side oxide layers on steam generator tubes from PWRs and radiochemical issues on the contamination of primary circuits, E. Schuster, K.H. Neeb, W. Ahlfänger, R. Henkelmann and R.T. Järnström 152 (1988) 1
Influence of nickel concentration on point defect migration in high-nickel Fe–Cr–Ni alloys, C. Dimitrov and O. Dimitrov 152 (1988) 21
Deuterium permeability of the austenitic stainless steel AISI 316, O. Gautsch and G. Hoddap 152 (1988) 35
The effects of silicon and titanium on void swelling and phase transformations in neutron irradiated 12Cr–15Ni steels, R.M. Boothby and T.M. Williams 152 (1988) 123
Hydrogen in 316 steel – Diffusion, permeation and surface reaction, D.M. Grant, D.L. Cummings and D.A. Blackburn 152 (1988) 139
Tensile properties of welded helium charged 304L stainless steel, S.L. Robinson 152 (1988) 212
Flow-assisted corrosion of steel and the influence of Cr and Cu additions, D. Cubicciotti 152 (1988) 259
Steady-state corrosion rate of Type 316 stainless steel in sodium in a non-isothermal loop system (Letter to the Editors), T. Suzuki and I. Mutoh 152 (1988) 343

Swelling
A simulation of the swelling of intermetallic reactor fuels (Letter to the Editors), R.C. Birtcher, C.W. Allen, L.E. Rehn and G.L. Hofman 152 (1988) 73

Thermodynamic Properties
Vaporization study of solid CeTe by the Knudsen effusion mass spectrometric method, T. Koyama and M. Yamawaki 152 (1988) 30
The thermal expansion of solid UO_2 and (U, Pu) mixed oxides – A review and recommendations, D.G. Martin 152 (1988) 94
Estimation of sonic velocity in molten UO_2 by an internal pressure approach, A.M. Azad and O.M. Sreedharan 152 (1988) 182
The critical point data of refractory metals, aluminum oxide and uranium dioxide using the Hoch–Arpshofen method, M. Hoch 152 (1988) 289
Chemical interactions in water-cooled nuclear fuel: A thermochemical approach, E.H.P. Cordfunke and R.J.M. Konings 152 (1988) 301

Thermophysical Properties
Vaporization study of solid CeTe by the Knudsen effusion mass spectrometric method, T. Koyama and M. Yamawaki 152 (1988) 30
Oxidation state of uranium in $Y_xU_{1-x}O_{2\pm y}$ solid solution by magnetic susceptibility, C. Miyake, T. Isobe and S. Imoto 152 (1988) 64
High-heat-flux test of commercial graphite tiles by high current and low energy electron beam, M. Fujitsuka, T. Shikama, Y. Yamauchi, H. Shinno and M. Okada 152 (1988) 163

Uranium and Uranium Alloys
The passivation of uranium metal surfaces by nitrogen bombardment – The formation of uranium nitride, G.C. Allen and N.R. Holmes 152 (1988) 187
Diffusion of liquid uranium into foils of tantalum metal and tantalum–10 wt% tungsten alloy up to 1350 °C, M. Kuznietz, Z. Livne, C. Cotler and G. Erez 152 (1988) 235
Methods for physical vapor deposition of the amorphous uranium–16.4 at% chromium alloy (Letter to the Editors), T.G. Kollie, J.G. Gooch, C.M. Egert, R.L. Bridges and D.A. Carpenter 152 (1988) 334

Uranium Ceramics
Oxidation state of uranium in $Y_xU_{1-x}O_{2\pm y}$ solid solution by magnetic susceptibility, C. Miyake, T. Isobe and S. Imoto 152 (1988) 64
The thermal expansion of solid UO_2 and (U, Pu) mixed oxides – A review and recommendations, D.G. Martin 152 (1988) 94
SGMP – An advanced method for fabrication of UO_2 and MOX fuel pellets, E. Zimmer, C. Ganguly, J. Borchardt and H. Langen 152 (1988) 169
Estimation of sonic velocity in molten UO_2 by an internal pressure approach, A.M. Azad and O.M. Sreedharan 152 (1988) 182
The passivation of uranium metal surfaces by nitrogen bombardment – The formation of uranium nitride, G.C. Allen and N.R. Holmes 152 (1988) 187
The critical point data of refractory metals, aluminum oxide and uranium dioxide using the Hoch–Arpshofen method, M. Hoch 152 (1988) 289

Void Formation
A simulation of the swelling of intermetallic reactor fuels (Letter to the Editors), R.C. Birtcher, C.W. Allen, L.E. Rehn and G.L. Hofman 152 (1988) 73
The effects of silicon and titanium on void swelling and phase transformations in neutron irradiated 12Cr–15Ni steels, R.M. Boothby and T.M. Williams 152 (1988) 123

Wastes *(Radioactive)*
Volumetric change of simulated radioactive waste glasses irradiated by the $^{10}B(n, \alpha)^7Li$ reaction as simulation of actinide irradiation, S. Sato, H. Furuya, T. Kozaka, Y. Inagaki and T. Tamai 152 (1988) 265
X-ray spectroscopic investigation of Pu-substituted zirconolite, R.B. Greegor, F.W. Lytle, R.J. Livak and F.W. Clinard, Jr. 152 (1988) 270
Simulated high-level nuclear waste glass leached in one type of Japanese groundwater (Letter to the Editors), H. Kamizono and H. Nakamura 152 (1988) 339

Zirconium, Zirconium Alloys and Compounds
Effects of iodine concentration on iodine-induced stress corrosion cracking of Zircaloy-4 tube, W.S. Ryu, Y.H. Kang and J.-Y. Lee 152 (1988) 194
Irradiation growth in zirconium–tin alloys at 353 and 553 K, A. Rogerson and R.H. Zee 152 (1988) 220
X-ray spectroscopic investigation of Pu-substituted zirconolite, R.B. Greegor, F.W. Lytle, R.J. Livak and F.W. Clinard, Jr. 152 (1988) 270
Anomalously high rate of oxidation of Zircaloy particles in air at the $\alpha/\alpha+\beta$ phase transformation (Letter to the Editors), T. Bereznai and R. Würtz 152 (1988) 323
